[Sesh]/:

Hi mrs Sm for the poster do we have to have a written case study to go with it???

Rosh Sunder:

Yep

[Sesh]/:

Mrs s did u submit our assign back coz there is nothin on blackboard, and do we have to print the poster and give u in may or u just will check it first. Thanks. Sori to disturb. Happy Easter!!

Rosh Sunder:

Hi sorry....check Bb for some answers.

[Sesh]/:

Ok thanks

Rosh Sunder:

Sorry very sick with flu and bronchitis :&

[Sesh]/:

Oh no.. Hope u feel beter.. Have loads of rest

[Sesh]/:

Cn I trouble u?

Rosh Sunder:

Yep

[Sesh]/:

I did a case study right on neurofibromatosis

Rosh Sunder:

And?

[Sesh]/:

I want to use this and put it on the poster

[Sesh]/:

From the research I did I found out that mri is the best to diagnose neurofibromatosis

Rosh Sunder:

You cannot use da same case twice, you need to cover other areas and different applications to broadly cover the learning outcomes....these r the things u missed @ lectures.

Rosh Sunder:

MRI is fine to be integrated

[Sesh]/:

Ja so in my poster I must talk about mri being superior to mdct

[Sesh]/:

In the actual case study ct was used. And the patient referred for an mri.

Rosh Sunder:

Oh sorry, were u talking about the poster, blame it on being muzzy :\$

[Sesh]/:

I gt a table comparing ct and mri

[Sesh]/:

Lol

[Sesh]/:

U makin me scared here

[Sesh]/:

So I'm I on the right track?

Rosh Sunder:

Try to collect MRI information for case. It will validate discussion....show both sets of images.

☒Sesh☒/:

But the patient neva go for it the patient went home

☒Sesh☒/:

The patient was referred to ialch but they did not go

Rosh Sunder:

Remember imaging of nervous system is diploma work, b tech is advanced imaging using CT + MRI

☒Sesh☒/:

But in theory got info that says that mri is the baseline for diagnosing neurofibro

☒Sesh☒/:

So I need to get that images

Rosh Sunder:

And in CT its highly specialized applications....see worksheet given in terms og applications

☒Sesh☒/:

But in the case study they used mdct

☒Sesh☒/:

So in my poster can I speak about petct even thou it was not used in the case?

Rosh Sunder:

I am saying that neurofibromatosis might not b appropriate to highlight value of advanced imaging @ btech

☒Sesh☒/:

But the doctors were sayin its very rare and good for a case study. But not a poster?

Rosh Sunder:

Yes, u must include role of other imaging in the discussion

☒Sesh☒/:

In the poster?

☒Sesh☒/:

And the case study?

Rosh Sunder:

It may make a good case study but imaging of the nervous system using CT and MRI is diploma level.

☒Sesh☒/:

But in our practise they don't use anything else..

☒Sesh☒/:

U want an angio?

Rosh Sunder:

Look at learning outcomes and lesson plans to help.with picking appropriate topics.....this was emohasised in class.

☒Sesh☒/:

Is there anyway that I can intergrate the learing outcomes. Like in the discussion I will speak about the advanced imagng modalities. And on the poster I can say how that advanced modality can diagnose the pathology

Rosh Sunder:

Ok I'm confused again,r u talking about poster still.

Rosh Sunder:

The learning outcomes must b integrated

Rosh Sunder:

I don't understand what u mean

Rosh Sunder:

About the discussion and the poster

☒Sesh☒/:

Ok.. I did a case study on neurofibrmatosis and mdct. On research I found that mri is superior. So I gt that on the case study. This was done at the hospital. So if I do more research and find out advanced imaging that can be used but was not used and put it in the discussion of the case study. Is that fine. Then I'll take one of that advanced technique and speak about it in the poster comparing normal ct and mri? Is that ok?

☒Sesh☒/:

Mrs s.. I feel if I scrap this whole thing then I'm gona b in big trouble

☒Sesh☒/:

Pls help me to find away to make it work

☒Sesh☒/:

Its like I'm saying what was used, but would have been beter

Rosh Sunder:

Yes but you were told @ the outset and repeatedly that you must exclude the nervous system.....so your topic is inappropriate for btech becos UT involves the nervous system

Rosh Sunder:

Mdct was used, but what was scanned?

Rosh Sunder:

? Brain, body?

[X]Sesh[X]:

Brain and spine

Rosh Sunder:

If it is imaging of the nervous system u have to scrap it,...it is not in the Learning outcomes for btech.

Again I have repeatedly made this clear in class.

Rosh Sunder:

I will accept functional imaging using CT or MRI of the brain cos that is advanced imaging.

[X]Sesh[X]:

The brain and spine

[X]Sesh[X]:

So I need to scrap this case?

Rosh Sunder:

Is covered in your diploma.....this is the risk of missing lectures....many important things are missed.....sorry but this case will b appropriate.

[X]Sesh[X]:

Can I do a case study on carotid angiography?

Rosh Sunder:

I will be back @ work on Thursday, perhaps we need to talk.....isuggest u talk to a peer from class

[X]Sesh[X]:

They are also lost

Rosh Sunder:

Angiography using CT - yes.

[X]Sesh[X]:

Ok thanks

Rosh Sunder:

The emphasis is in the technology not the pathology

[X]Sesh[X]:

I'll do the case on carotid angiography

[X]Sesh[X]:

Carotid angio usin ct is acceptable?

Rosh Sunder:

Why r they lost?

Rosh Sunder:

Yes

[X]Sesh[X]:

Coa they doin on hernia and not advanced stuff with techgnology

[X]Sesh[X]:

We thought its rare pathology that is needed

[X]Sesh[X]:

That's why I grabbed this

Rosh Sunder:

It was very emphasised in class that the focus is on technolgy but the case must also be interesting.

Rosh Sunder:

Please tell whoever confused they must talk to me. Hernias sound inappropriate too.

[X]Sesh[X]:

Ok

Rosh Sunder:

This is not a pathology subject!

[X]Sesh[X]:

Hi.. For the seminar who do we pay?

Rosh Sunder:

Sorsa....I go back to work 2 moro will send details

[X]Sesh[X]:

We have a choice right? To go for lecture or the seminar?

[X]Sesh[X]:

Seminar is compulsory?

Rosh Sunder:

I would like it 2 b....will depend on whole class

☒Sesh☒/:

Ok

☒Sesh☒/:

Hi mrs s. For our poster we mst have a written case study and highlight the points on the poster such as 3d postprocessing in cta

Rosh Sunder:

What do u mean?

☒Sesh☒/:

I'm doin a case study on upper limb computed angiography. I use the same case for the poster?

☒Sesh☒/:

PING!!!

Rosh Sunder:

What do mean a case study and using the case for the poster?

Rosh Sunder:

We had this conversation already :/

☒Sesh☒/:

U said that we need a written case with the poster

Rosh Sunder:

I don't know what u mean?

Rosh Sunder:

I suggest u call me tomorrow

☒Sesh☒/:

When I asked u the other day if the poster must have a write up u said yes

Rosh Sunder:

I am not sure what you men by a " write up"

☒Sesh☒/:

Everyone I spoke to says that the poster has to be. A case study

Rosh Sunder:

To avoid any mire confusion around this u suggest you call me tomorrow. You seem the only one confused about what to do and I can only assume its becos you were not in class when the instructions were given

Rosh Sunder:

I think you need to make an apontment to see me....mayb next Monday as I. Am unavailable 2moro

☒Sesh☒/:

Ok.. But all I want to know if the poster needs to b a case study.. Athena, anceyn and all tell me that it does

Rosh Sunder:

I am concerned that we're not having da same conversation and don't want to confuse some more

☒Sesh☒/:

Ok.. Tell me what poster u want and then I'll see if I'm right

Rosh Sunder:

PLease see messages posted in Bb, mayb it will help

Rosh Sunder:

Call me tomorrow and make an appointment
