

## PEER TESTIMONIAL FOR MRS R. SUNDER

Dear Sir/ Madam

This serves as a testimony of the mentoring that has been impacted by Mrs. Roshnee Sunder upon myself as Specialist Instructor in the Department of Radiography. I started working at Durban University (DUT)'s Radiography department in February 2009. When I started I was allocated two subjects to lecture and Mrs Sunder was the previous lecturer for one of them. She immediately displayed herself as an individual who was very generous and caring. She provided me with all the assistance I required regarding the said subject. A certain level of support was expected in this regard but Mrs Sunder excelled in the provision thereof.

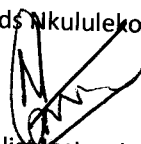

I have witnessed good quality practices undertaken by Mrs Sunder. This is more noted when the department is preparing for assessments particularly during reviews of assessment papers. There were several times when I had to seat with her modifying errors on my assessment papers. These errors usually range from minor spelling mistakes to technical errors like realignment of sentences but what has been amazing is the ability of Mrs Sunder to note these errors for most papers reviewed in her presence.

Mrs Sunder is a good role model who has high levels of work ethics and esteem. She is rarely seen out of her working station regardless of whether it is the office or the classroom. When there is a task to be completed, Mrs Sunder would not rest until the task is complete and properly done. Mrs Sunder is a moderator for two of the subjects that I lecture and good guidance and professional practice is usually observed throughout her moderator's reports. She is very diligent and innovative in all that she does.

As a senior in my job she has impacted a high level of knowledge on me as she is a brave outspoken person who has no fears in sharing her thoughts. Mrs Sunder has a vast knowledge and skills in the use of computers and she is using online teaching and learning for all of her subjects.

I would recommend Mrs Sunder for any award that is related to good mentoring of others. She always maintains dignity and respect for others whilst ensuring transferring of skills and knowledge to an individual.

Regards Nkululeko Gam

Specialist Instructor: Radiography
