

Samara-Lee Naicker.

I worked hard to get this mark, and I did this by continuously working on activities in the activity book as well as past papers. I also learnt my work according to the learner guide.

I also must say, that WebCT did hinder my learning in that <sup>this is the first subject that involved</sup> learning online so I had to adjust to this.

Well my mark is not what I want and I shouldn't have left studying for last minute. I could have done way better ~~at~~ then this. Plus I did selective studying (This didnt work) and personally I need lectures.

*1/12/2016*

My mark of 54% is very disappointing for me. I felt that the work load was very big and the prescribed textbook is not the easiest to learn from. I also thought that the beginning lectures where we only answered questions didnt help me even when I had completed everything, I felt alot better about the work when it was lectured to us.

for the next assessment I will definately be doing more work at home and start preparing sooner.
